6th National Lymphoedema Conference

America Square
Conference Centre, London
28th February 2019

Feedback from the 2018 conference

"All the topics covered were in detail especially the psychological effects and patients comfort. Also the exposure to current innovations in the management of lymphoedema was most useful. I have learnt a lot today, a knowledge that I would share with my team."

"I thought the whole thing was informative and very relevant"

"Another very good conference. Very informative, probably the best lymphoedema conference available"
